

1000 SERIES CASTORS

UP TO 1000KG / CASTOR

The 1000 Series 1000kg load rating provides an economical alternative to heavier load bearing castors. The ability to be towed at a 6kph by tugs and tractors enables this castor to be used on mobile platforms, aviation trolleys, automotive assembly lines and production manufacturing plants.

The polyurethane cast iron wheel type with a rolling diameter of up to 300mm not only enhances maneuverability but decreases rolling resistance. Like most Richmond heavy duty castors, our 1000 series has a precision machined ball race and high tensile steel kingpin to withstand side impact loads.

MOUNTING PLATES AVAILABLE IF REQUIRED
