

# RUBBER TYRED NYLON WHEELS

Rubber Tyred Nylon Wheels are a low cost alternative to rubber tyred cast iron wheels. They are hard wearing, with a high resistance to corrosion and lightweight whilst still boasting a high load bearing capacity.

200	35	58	1/2" or 20mm	Roller	200/175	Grey	<b>RN8876</b>

# RUBBER TYRED CAST IRON CENTERED WHEELS

These wheels are cast iron centred for extra strength and ease of movement. They offer a cushioned ride, are quiet and shock absorbing, and are fitted with roller bearings for ease of rolling.

Blue tyres are non-marking with high resilience, and black tyres have are harder wearing and therefore last longer than blue tyres.
