

P HANDLE TROLLEY

WITH 250MM PUNCTURE PROOF WHEELS

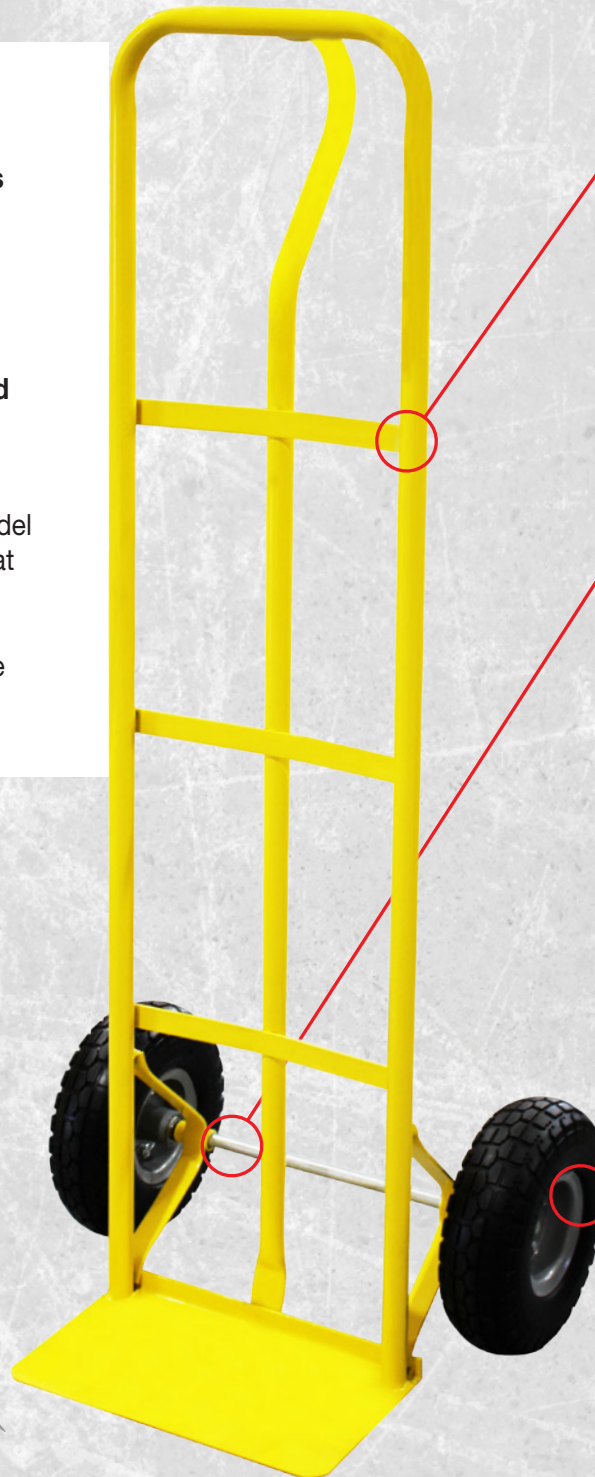

If you're a professional requiring a hand trolley built for performance, why risk your business or precious time on an unreliable "prone" to breakdown super cheap trolley? Richmond's P Handle is an alternative without breaking the bank and is built to survive the rigours of courier, commercial, and high frequency use.

The **PHR105** P Handle Trolley comes with two of our **PF1072** economy model offset puncture proof wheels. Our "flat free" puncture proof wheels combine the strength and stability of a solid rubber wheel, with the cushioned ride of a pneumatic.
