

STACK & NEST CRATES

STACKING

When your stack & nest crates are full, you can sit them on top of one another without damaging the contents of the crate below. In order to achieve this, all you need to do is rotate the tubs 180 degrees, ensuring that each second tub is facing in the opposite orientation to the other.

NESTING

When not in use, our stack & nest crates will slide inside of each other nicely, allowing you to save space. We call this 'nesting'. In order to achieve the nesting position, place your tubs inside of one another, all facing the same orientation.
