GTR500 & GTR501 !		GTR502 & GTR503 !

TECHNICAL SPECIFICATION

Frequency: 433.92MHz
Batteries: 1 x 27A Battery

The GTR179 Gate Remote:

The **GTR179 Gate Remote** is compatible with the Richmond Rolling Solutions sliding gate kits: **GTR156**, **GTR212**, **GTR061** and **GTR207**.

Each **GTR179 Gate Remote** features 4 x buttons. The top button is the primary Open/Close button while the bottom button is for pedestrian mode only. The 2 x middle buttons can be utilised for pairing to additional Richmond Rolling Solutions Sliding Gate Openers or other compatible Richmond Rolling Solutions products.

Kits (see “The GTR179 Gate Remote & The GTR197 Remote External Receiver: Pairing a Richmond Rolling Solutions Sliding Gate Motor to a GTR179 Gate Remote).

As standard, each newly purchased compatible Richmond Rolling Solutions Sliding Gate Opener comes with 2 x pre-paired GTR179 Gate Remotes. Any additional GTR179 Gate Remotes purchased will require pairing to the sliding gate’s PC Board located under the motor cover.

Pairing Additional GTR179 Gate Remotes to Your Sliding Gate Opener:

If you have a requirement to pair additional **GTR179 Gate Remotes** to your Richmond Rolling Solutions Sliding Gate Opener, please consult the **Sliding Gate Opener User Manual** that came with your specific sliding gate opener. Below are web page links to the four applicable **Sliding Gate Opener User Manuals**:

GTR156 – 240V AC Sliding Gate Opener (Loads up to 1200kg):

<https://www.richmondau.com/wp-content/uploads/2022/11/In-boxGTR156-instruction-manual-REV28.docx.pdf>

GTR212 – 240V AC Sliding Gate Opener (Loads up to 2000kg):

<https://www.richmondau.com/wp-content/uploads/2021/12/GTR212-instruction-manual-REV04.pdf>

GTR061 – 240V AC Sliding Gate Opener (Loads up to 800kg):

<https://www.richmondau.com/wp-content/uploads/2021/12/GTR061-instruction-manual-Revision-3.pdf>

GTR207 – 24V Low Voltage AC Sliding Gate Opener (Loads up to 800kg):

<https://www.richmondau.com/wp-content/uploads/2021/12/GTR207-instruction-manual-Revision-4.pdf>

Please note: Each compatible Richmond Rolling Solutions sliding gate opener does have a maximum limit for the number of GTR179 gate remotes that can be paired directly to it:

GTR156 – 240V AC Sliding Gate Opener (Loads up to 1200kg):	25 x GTR179 Gate Remotes
GTR212 – 240V AC Sliding Gate Opener (Loads up to 2000kg):	25 x GTR179 Gate Remotes
GTR061 – 240V AC Sliding Gate Opener (Loads up to 800kg):	25 x GTR179 Gate Remotes
GTR207 – 24V Low Voltage AC Sliding Gate Opener (Loads up to 800kg):	25 x GTR179 Gate Remotes

The GTR179 Gate Remote & The GTR197 Remote External Receiver:

Pairing More Than 25 x GTR179 Gate Remotes to Your Sliding Gate Opener:

If you have a requirement for additional remotes beyond the maximum allowable 25, you can purchase a Richmond Rolling Solutions optional accessory called the **GTR197 Remote External Receiver**. The GTR197 has the capacity to pair up to 250 x additional **GTR179 Gate Remotes**.

Pairing a Richmond Rolling Solutions Swing Gate Motor to a GTR179 Gate Remote:

If you have a swing gate fitted with a Richmond Rolling Solutions Swing Gate Automation Kit on your property as well as a sliding gate fitted with a Richmond Rolling Solutions Sliding Gate Opener and you want to reduce the number of gate remotes that you are using to operate both gates, you can pair the swing gate motor to the **GTR179 Gate Remote** by utilising a **GTR197 Remote External Receiver**.

You can pair the **GTR197 Gate Remote** to the **GTR197 Remote External Receiver** utilising any of the first 3 x buttons on the gate remote (remembering that the bottom button is reserved for pedestrian mode only) that **have not** already been utilised for another gate motor or external receiver.

For additional information on the **GTR197 Remote External Receiver**, visit:
