

Setting up the KartR

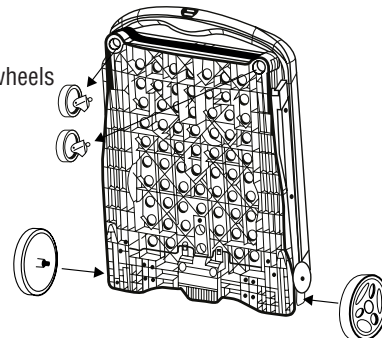

Step 1

To begin, remove all 4 wheels from the bottom of the platform.

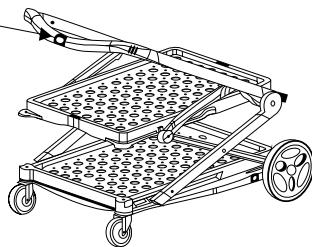

Step 2

Insert wheels as shown in diagram. You will hear the wheels click into place.

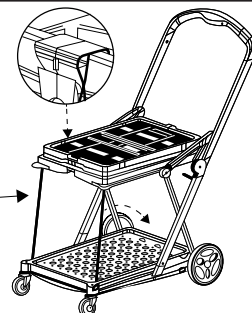

Step 3

To expand the trolley, push the button located on the handle and pull upwards. You can now lock the handle in 2 different positions.

Step 4

Place the basket onto the upper deck and fix it into position using the pull-cord straps. To do this, pull the cords out and place on the top rim of the basket as shown.

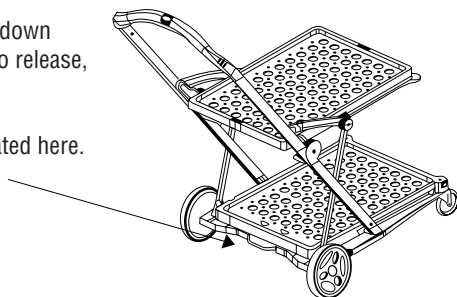

If required, you can also use the fold-down support bars to increase load capacity of the upper deck.

Using the Brake

To use the brake, push down gently with your foot. To release, pull up with your foot.

Foot pedal brake is located here.

Raising the Top Platform

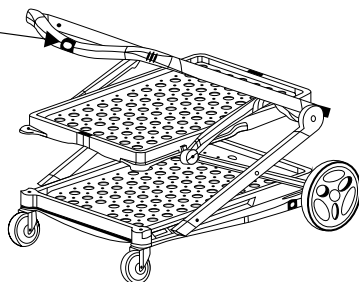

For transporting larger goods you can pull the top platform up. The basket may also be used on the bottom platform.

Collapsing the KartR

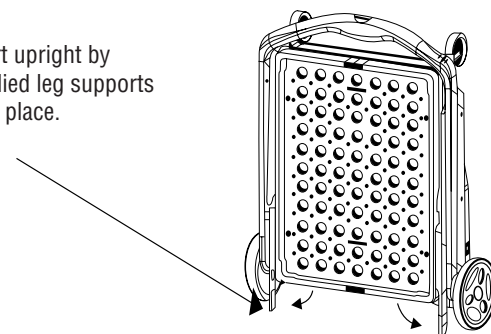

Step 1

To collapse, push down on the button located in the handle of the cart. The cart will then fold down.

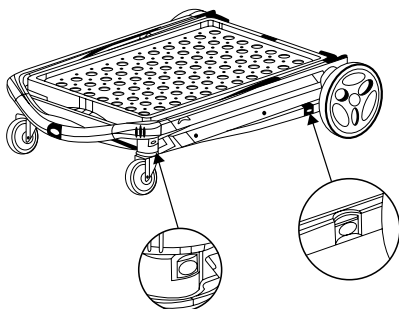

Step 2

You may stand the cart upright by pulling out the 2 supplied leg supports and clicking them into place.

Step 3

To remove the wheels, press down on the button located at the top of each wheel.

Total Cart Capacity: 100kg
Top Platform Capacity: 50kg
Bottom Platform Capacity: 50kg
Unit Weight: 10kg

Step 4

To store the wheels, clip back into place under the platform.
